

# LEGI-Fit INSTALLATION INSTRUCTIONS

Hang the LEGI mesh panels onto the hooks of the LEGI-fit posts at 2500 on-center and attach the clamping tube.

SET FENCE POSTS AT STANDARD SPACING OF 2500mm(8'-2 7/16") ON-CENTER OR AT OTHER ON-CENTER POST SPACING PER PROJECT REQUIREMENTS.

1. Hang mesh panel section on *fit* post.
2. Hang next mesh panel.
3. Attach clamping tubes.
4. Assemble and install post cap per instructions on page 3.
5. Assemble the next mesh panels per above until complete.
6. Finished installation.

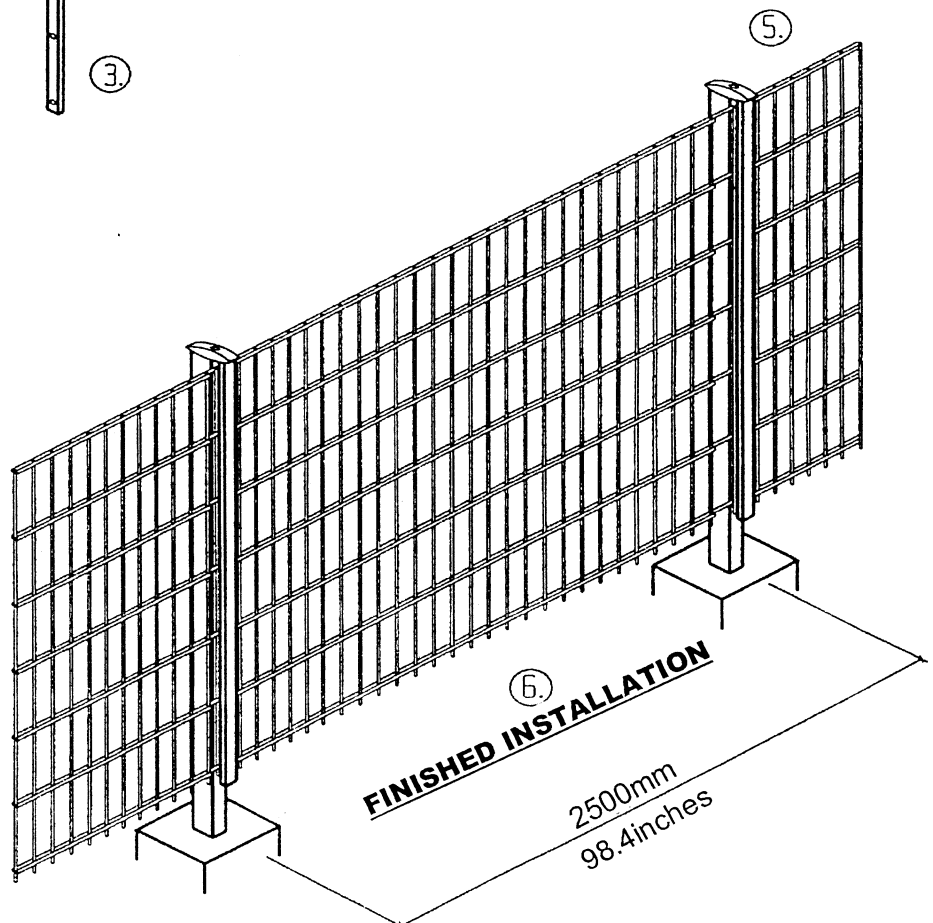

## Notes:

The mesh panel can be erected with the pickets pointing up or down, as required.

With large mesh panels, it is recommended to rest the bottom edge of the mesh panel on the lowest hooks of the *fit* post. Then raise alternating sides of mesh panel onto higher hooks.

See page 2 for stepped fence installation instructions.

Touch-up paint is provided for onsite application.
