

LEGI-Fit INSTALLATION INSTRUCTIONS

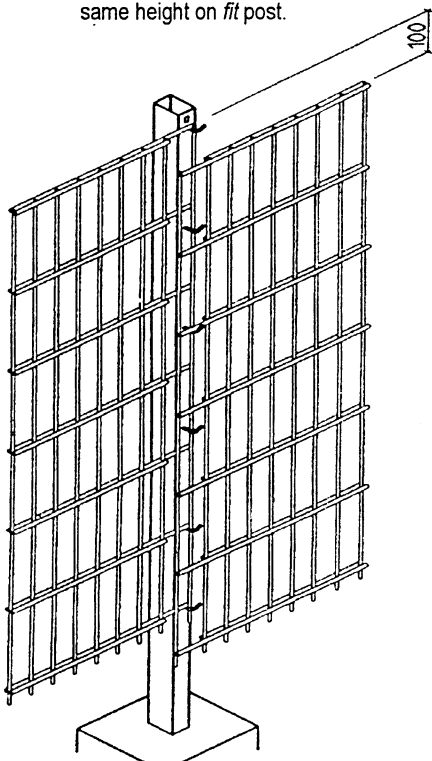

Step mesh panels.

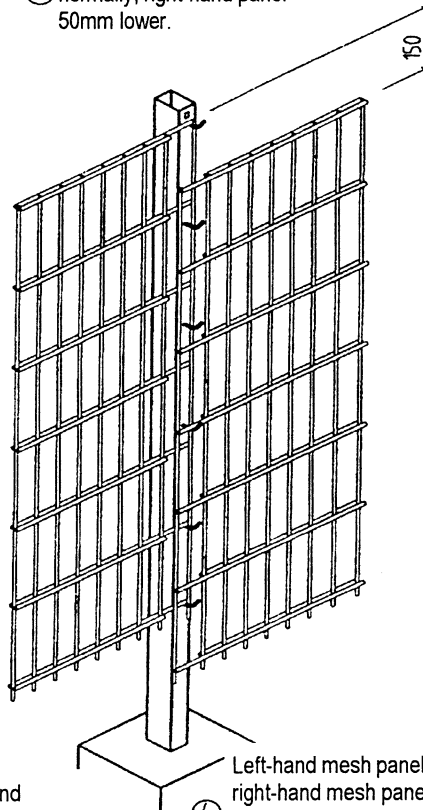

① Both mesh panels hung at same height on fit post.

② Left-hand mesh panel hung normally, right-hand panel 50mm lower.

③ Left-hand mesh panel hung normally, right-hand mesh panel 100mm lower.

④ Left-hand mesh panel hung normally, right-hand mesh panel 150mm lower, and so on....

Assembly:

The posts can be set at 50mm height increments to accommodate ground slope. After hanging the mesh panels on the posts, the clamping tube is attached (per instructions on page 1), and the post cap is bolted on (per instructions on page 3).

Note:

Lower mesh panel height can be adjusted as much as 40mm. This is achieved by securing, but not completely tightening the post cap, then adjusting mesh panel to the desired position, and finally tightening the post cap completely. Remember to not over-tighten the post cap.
